CHAPTER I

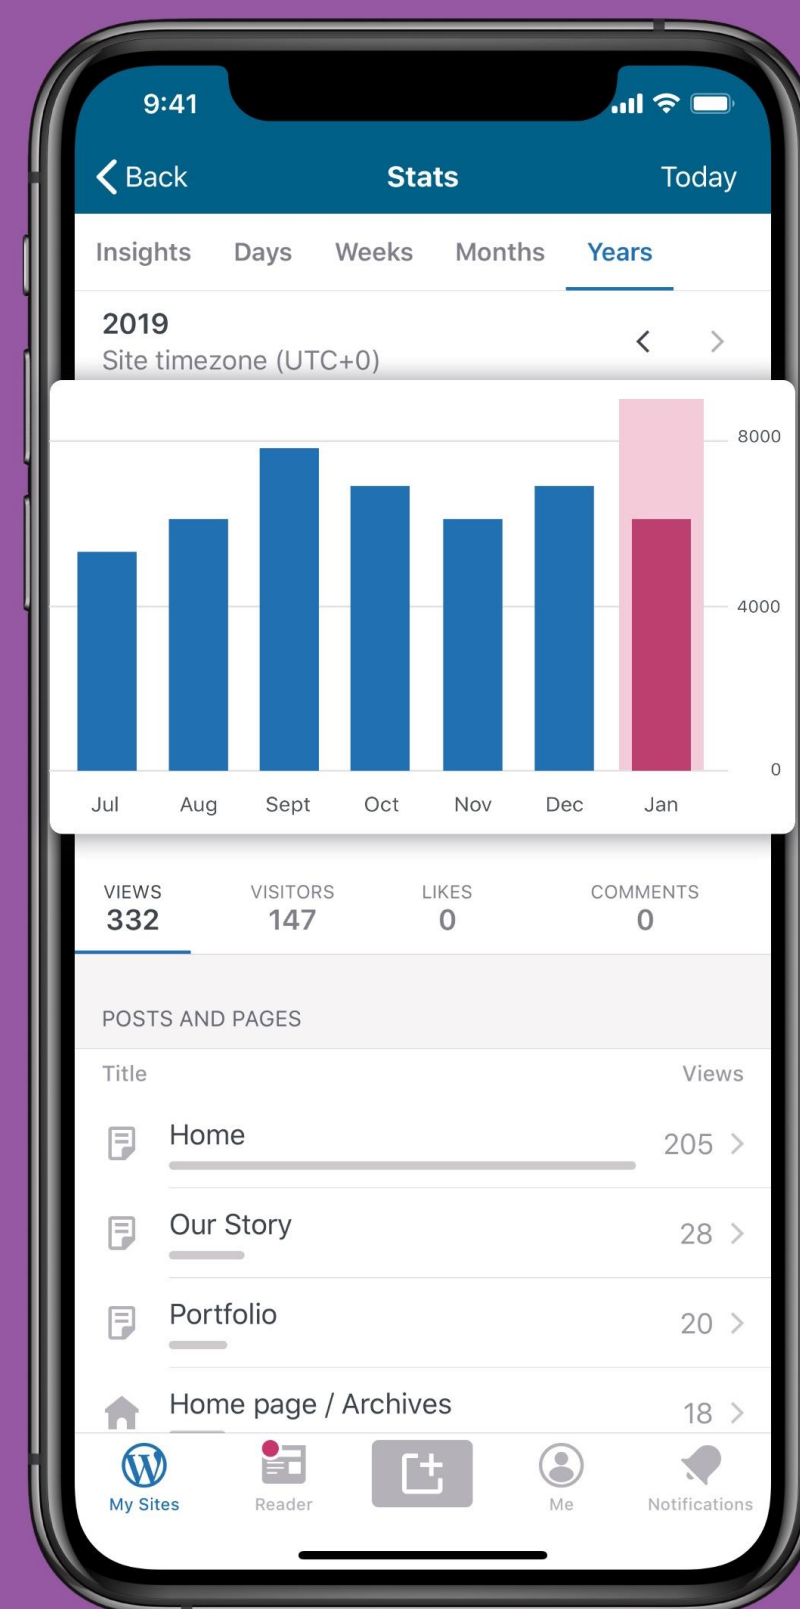

The WordPress mobile apps

The WordPress Mobile Apps

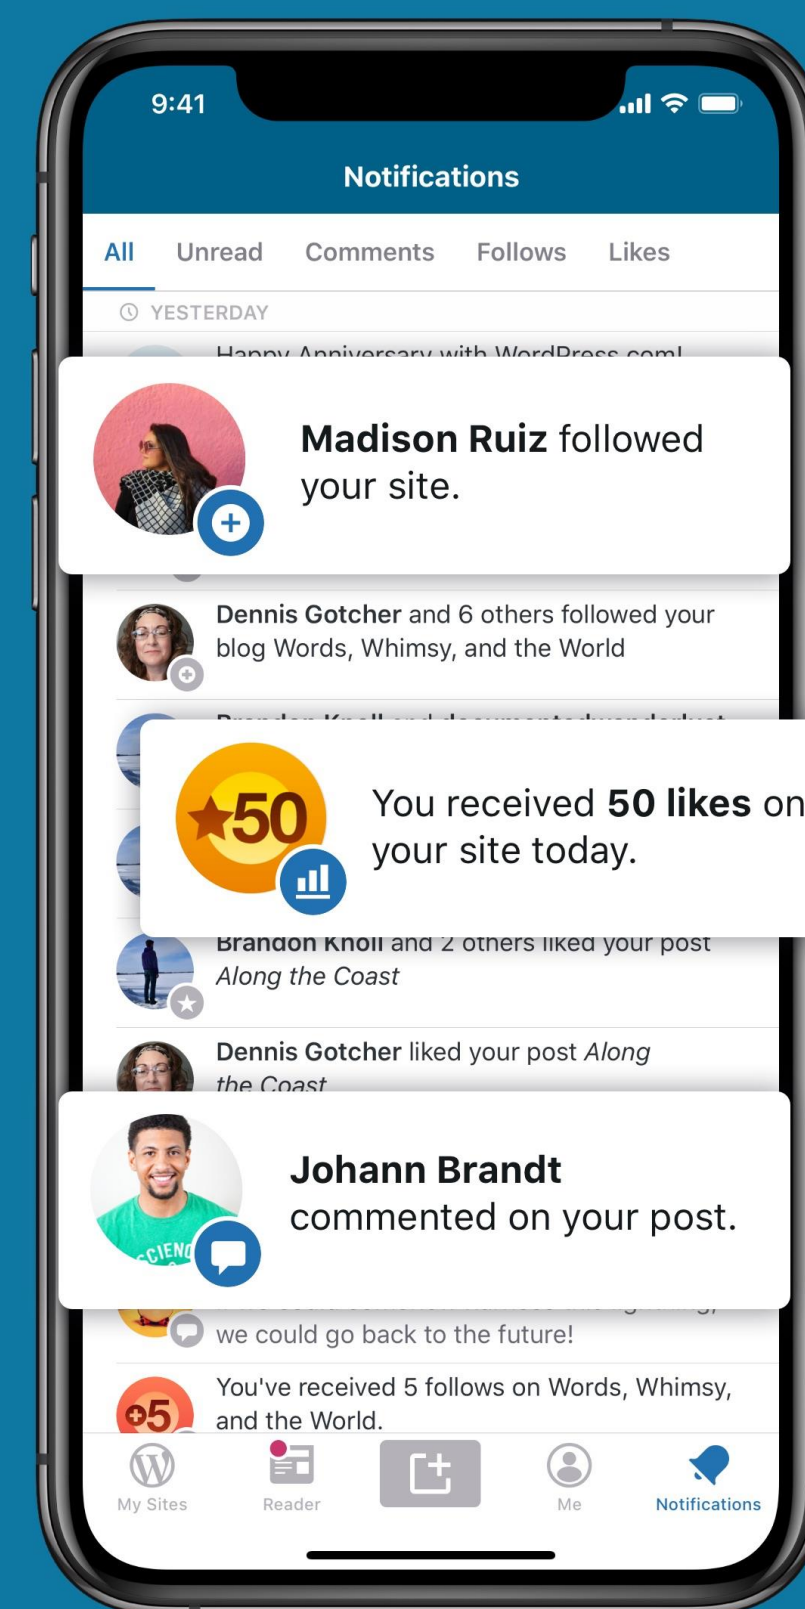

Create beautiful posts and pages

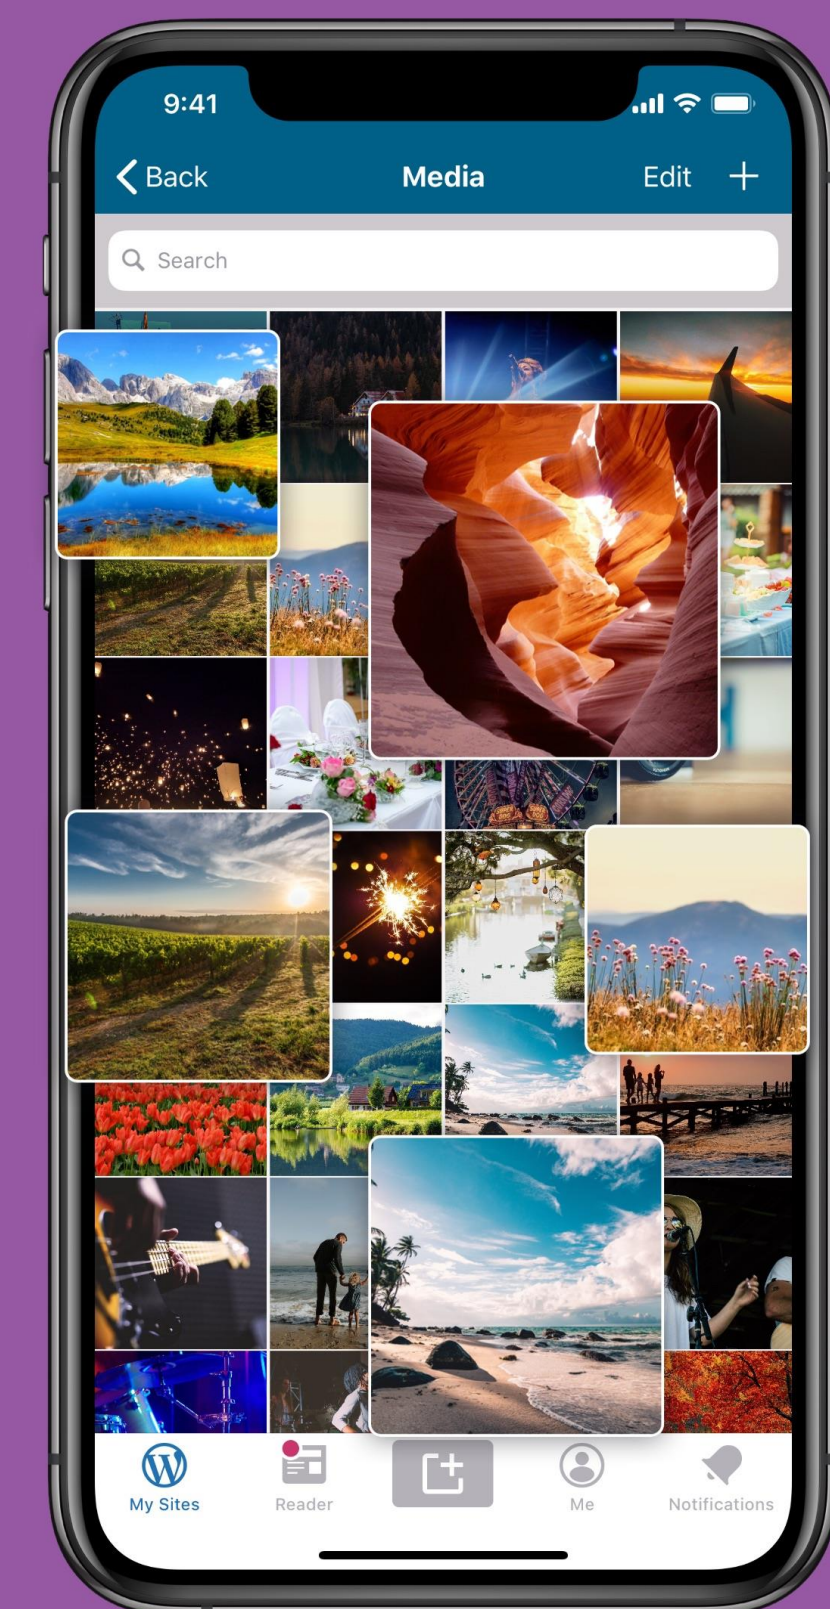

Track what your visitors love

Check what's happening in real time

Share from anywhere

The WordPress Mobile Apps

- Developed as open source
- Developed in the main native languages for each platform:
 - Kotlin and Java on Android
 - Swift and Objective-C on iOS
- Gutenberg integration via React Native

CHAPTER II

The people building the apps

Automattic mobile team

We are serious about growing diversity in the tech industry

- 53 people distributed across 20 countries.
- Gender diversity of new hires: 35% women.
- 70% of new hires speak English as a second language.
- Languages spoken across the team: English, Spanish, Czech, Italian, Turkish, Portuguese, French, Mandarin, Greek, Polish, Hebrew, Serbian, Ukrainian, Tamil, Filipino, and Patois.

CHAPTER V

We want you!

Contributing

- Testing.
- Feedback and feature requests.
- Localization.
- Code.

Contributing Testing

- Regular calls for testing, for both the Android and iOS apps are issued every two weeks in the Make WordPress Mobile blog.
- The calls for testing are a perfect opportunity to start catching up with the development efforts: what is being built, and what is in the pipeline.
- Helping us identify what is broken, or providing feedback on the usability and value of new features is extremely valuable.

make.wordpress.org/mobile

Contributing Feedback and feature requests

- The easiest way to contribute feature requests is logging issues on GitHub
- You can also reach the team in the WordPress slack
- We build the apps for you. We want your feedback!

make.wordpress.org/chat/

Contributing Localization

- The WordPress mobile apps are localised.
- The release notes and app stores description is localised.
- Translations are managed in GlotPress.
- Translations are updated with every release, every two weeks.

translate.wordpress.org/projects/apps/

Contributing Code

WordPress iOS

1. Pick an issue!
2. Issues labelled as “good first issue”
3. Review the coding standards
4. Fork the repo
5. Submit a PR
6. ☐ ☐
